

OUR TESTIMONIALS

“The non-invasive Thyroflex™ technology test represents the best that modern medicine has to offer, while at the same time, bringing back the original truths of clinical practice.”

- Dr Jeffery Dach M.D., Radiologist, Hollywood, Florida.

“The Thyroflex™ represents a quantum leap in the care of thyroid disease. Many physicians know that thyroid blood tests and basal temperature levels are woefully inadequate in subtle thyroid disease. The Thyrodine™ measurement of body iodine synergizes with the Thyroflex™ to give us a dynamic solution in managing the widespread elusive iodine deficiency / thyroid dysfunction that harms so many of our patients.”

- Dr Murray “Buz” Susser, M.D. (H). Scottsdale, AZ.

“I have used the Thyroflex™ to test thyroid function for the past seven years in my medical practice, and it has revolutionized the way I manage thyroid disease. I used to rely only on blood tests to evaluate thyroid hormone levels, but found them to correlate poorly with patient’s signs and symptoms. I have come to rely on the 98.5% accuracy of the Thyroflex™, with its close correlation to both patient’s symptoms and 24-hour thyroid urine testing. The addition of urine iodine testing has further expanded the tools I use to diagnose and treat patients. This one-minute urine test accurately assesses a patient’s iodine status, which is so vital in maintaining healthy thyroid function and in breast cancer prevention. At our center, we have performed hundreds of the Thyroflex™ and iodine tests each month for many years, proving the Thyroflex™ to be an invaluable workhorse for our physicians.”

- Dr Prudence Hall, Hall Center Venice. The Hall Center is regarded as being in the top three centers internationally, and in the USA.

“This doctor gave me my life back. He was the fourth endocrinologist that I saw in less than two years in NYC, when trying to get to the bottom of my fatigue, brain fog, joint pain, weight gain and fluid retention. Quickly into starting the thyroid medicine, I felt like my old self again. Even though I had antibodies and thyroid nodules, my other endos would just say ‘oh we just watch it’, DESPITE feeling so terrible. If you do research on how hypothyroidism is treated currently, you will quickly realize that many doctors are doing a disservice to their patients by not treating them with a dose of thyroid medicine. I believe in the future there will be more research done on how treating hypothyroidism earlier than later is crucial to health, and how blood tests are not the ‘be-all and end-all’ when it comes to diagnosis.” - Anna R

- Dr Hugh Melnick, Endocrinologist New York, from using the Thyroflex™ / Nitek ‘Core Hormone’ System.

OUR TESTIMONIALS

"It was through a training session on how to perform the Thyroflex™ on patients, that I first met Dr Turner. There I was, thinking that I was simply going to learn a new technique; not having the faintest idea, that I was about to find out – that the cause of my extremely poor health? Actually had a name. Not 'being psychosomatic', as other doctors had previously labelled it; no, rather – out of control hypothyroidism.

As it turns out... it pays to show up to training sessions. I'm not just someone who is over 30kg's lighter without exercise or dieting. I'm not just someone who no longer experiences mood swings, acne, insomnia, digestive problems, irregular periods, cramping, heat intolerance, and the rest. No, I am someone who is living the very definition of my dream life - not with the help of, but - BECAUSE OF, Dr Turner.

THAT'S why I am the Brand Ambassador of his nutraceutical line, TriFixx™ nutraceuticals. THAT'S why I hand out thyroid questionnaires to nearly every individual I meet. For I don't just owe my prosperity to Dr Turner, the Thyroflex™ and his treatment – I owe my life to them.

So, if you want to change lives, or have your own life changed and transformed beyond recognition – TriFixx™ it, with the Thyroflex™."

- Olivia Downie, Brisbane, Australia
Nitek Patient and TriFixx™ Brand Ambassador

"I recently had a patient featured on the Discovery Channel regarding her obesity... in my opinion, if we had the Thyroflex™ system, we would have identified the underlying cause and avoided Gastric Bypass surgery."

- Dr. Kent Holtorf M.D., Endocrinologist, Los Angeles, California.

"Once I took the Biothroid, Biodine and D3, within a short period of time, I felt like a teenager again. Vital and young, I had my life back. I said to myself "I'm back... I'm back".

- From one of our cherished patients, who was autoimmune and could hardly get out of bed, and had been to see 6 or 7 doctors.

OUR TESTIMONIALS

“I had spent years and years, trying to find the answers as to why I was struggling to get through the day (let alone the exhaustion, foggy mind, being cold all the time, constipated, and anxious). I had been to see doctors in India, all over Europe and the USA; trying to find a doctor for a solution for my exhausting thyroid symptoms. The clinics I visited, and paid good money for, tried everything – but nothing worked.

Dr. Turner actually sat down and listened to me, discussed my symptoms, and used the Thyroflex™, instead of using blood tests. He said “Aruna, it is not all in your head. I want you off the sedatives, and other mind-altering drugs – it is simply your thyroid. Your reflexes are slow, your neurotransmitters are slow, your resting metabolic rate is very low, and you have so many symptoms that you struggle with, your entire life. We can help you!”

I was skeptical, but it was the first time that I felt hope was being offered to me. I was not going nuts, it was not all in my mind, my symptoms had a definitive name: ‘Hypothyroidism’, with the autoimmune disorder ‘Hashitoxicosis’.

The simple Thyroflex™ test had not only identified the problem, but Dr Turner was able to get me onto the correct dose of natural bioidentical hormones, that totally changed my life.

My symptoms are gone, I have lost a lot of weight, the shape of my face and body have changed, I’m the person I thought I was when I was 20; the person that was stolen from me by my hormones, and the mistreatment, undertreatment and misdiagnosis that I had to suffer from for many, many years.

- Aruna, Nashik. INDIA
